PROJECT 3

Wednesday, November 5, 2025, 2025

- I did not work as I was sick.

Thursday, November 6, 2025

- Started working as I was feeling a little bit better.
- Completed the full testing and presentation.
- Made sure RoboRide is fully functional with the new Ncurses code.
- Made sure the RoboRide is fully charged and ready to run at full potential.
- Learned more about Ncurses and went through the code to understand.

Friday, November 7, 2025

- Took readings from the test and made a slide on ppt.
- Started working on week 10 work.
- Integrated ultrasonic sensor with the raspberry pi.
- Made sure to put resistors from echo and ground.
- Learned why we are using resistors.
- Tried to fix robots drift problem.

Monday, November 10, 2025

- Looked through some templates for troubleshooting report.
- Started on the troubleshooting report for this week.
- Transferred the notes I made into the report.
- Made updates on fritzing like adding ultrasonic sensor.

Tuesday, November 11, 2025

- Made changes in the code as instructed in the assignment.
- Changed sensor readings time from 200ms to 2s.
- Made sure the Robot is working fine .
- Tried to fix the drift in the robot.
- Checked that I have done all the tasks for this week.
