PROJECT 3

Wednesday, November 12, 2025

- Today I got the camera from lab.
- When I was examining, I found out that the pin is too wide to fit in the pi.
- I need to get a different camera cable with 22 pins so that I can plug it to the pi.
- Downloaded and went through the datasheet for the camera.
- Watched some videos on YouTube to get an idea of the camera.

Thursday, November 13, 2025

- Worked on the code for logging in data.
- Made sure the wiring is intact again.
- The ultrasonic sensor stopped working.
- Had to redo the wiring.

Friday, November 14, 2025

- Made the same test setup from last week for HCSR-04.
- I did a silly thing by using a can for HCSR-04 testing.
- Redid the test and got the readings.
- Took the readings.

Monday, November 17, 2025

- Got the 22 pin cable for camera as the 15 pin is not suitable with pi 0 w.
- Tried setting up the camera.
- Install camera library, sudo apt install libcamera.
- Tried troubleshooting as I was not able to make it work.

Tuesday, November 18, 2025

- Made sure that I had the exact type of wiring I want.
- Tried different orientation for the cable of camera.
- Tried all types of troubleshooting, still could not make it work.
