PROJECT 3

Wednesday, October 29, 2025

- Today in class I took down notes on everything we have to learn and implement for this week.
- Made sure we had the correct sensor to work on.
- We were appreciate for our report work.
- Learned briefly about Ncurses.
- Planned on using Arduino for testing the Ultrasonic sensor.

Thursday, October 30, 2025

- Planned the testing layout.
- Made a new code with Ncurses which does the same things.
- Made note on the changes and learnt new functions.

Friday, October 31, 2025

- Got started on the presentation for this week on HC-SR04.
- Planned the whole testing of how we will be setting up the sensors and using Arduino instead of pi.
- Made some diagrams for the presentation.

Monday, November 3, 2025

- Setup the sensors for testing.
- Made TinkerCad diagram for the setup.
- Took pictures and videos.
- Tested the code on RoboRide.

Tuesday, November 4, 2025

- Could not work and did not complete the presentation as I got sick.
